The Certified Accounting Technician (CAT) is a vocational qualification designed by ACCA that will allow you to support the work of professional accountants. The final-level examinations are equivalent in standard to the first year of a university degree programme. Consequently, CAT graduates are allowed to move directly to Fundamentals Level (Skills module).

The knowledge, skills and practical experience you have gained while studying the CAT qualification can exempt you from certain papers and count towards the practical experience requirement of the ACCA Qualification.

There are nine examinations to the CAT, which are split into four levels. Each level is designed to test the knowledge, skills and understanding needed to work in accounting support roles. As well as completing your examination, you will have to gain a minimum of one year relevant experience while undergoing your financial training to achieve the Technician qualification.

When you have fulfilled the criteria for Certified Accounting Technician status, ACCA will confer on you the title of Certified Accounting Technician and you will be able to use the letters ‘CAT’ after your name.

The CAT qualification could be your stepping stone to the ACCA Qualification and membership of the global body for professional accountants.

ACCA is a world-renowned professional qualification which was first introduced in the UK in 1904. The Association is the largest and fastest growing international accountancy body in the world. Today, ACCA has 436,000 students and 170,000 members in 180 countries with an extensive network of offices and centres in nearly 91 countries. Wherever you may be, there is always support at hand.

The aim of ACCA is to offer itself as the first choice of qualification to individuals seeking a rewarding career in accountancy, finance and management. With over a hundred years of accounting and financial experience, ACCA is widely respected.

Every eight minutes, somewhere in the world, someone is registering himself or herself as an ACCA student. Does this mean that you will still stand out from the crowd? Most certainly! ACCA students and members are individuals in every sense of the word, unbound by business-sector or country-border constraints.

WHAT IS THE CFAB
The Certificate in Finance, Accounting and Business (CFAB) was launched by The Institute of Chartered Accountants in England and Wales (ICAEW) in September 2008 in United Kingdom (UK) as a new stand-alone business qualification.

It provides essential knowledge in the fundamentals of finance, accounting and business, and can be used as an entry route into the ICAEW programme.

THE CFAB FOR SCHOOL LEAVERS
Following the launch of the CFAB in UK, Sunway TES CAE formulated an innovative pathway for school leavers.

This specially designed pathway is a feeder into the ICAEW and provides school leavers with an accelerated route to the ICAEW ACA qualification.

The ACA qualification is regarded globally as one of the leading business and finance qualifications, and is recognised and valued in practice, industry, commerce and the public sector.

WHY CFAB FOR SCHOOL LEAVERS
